

Workshop Overview

by
John Baker,
ENARD Annex I Operating Agent,
EA Technology Consulting (UK)

ENARD: The IEA Implementing Agreement on Electricity Networks Analysis, Research & Development

- Established as a new IEA Implementing Agreement, July 2006, following on from various discussion and dialogue with specific countries and within the IEA;
- Consistent with commitment from G8 Gleneagles Summit, July 2005 “to draw together research into the challenges of integrating renewable energy sources into electricity networks and optimising the efficiency of grids”

Workshop Overview

- Organised in conjunction with the ECG and the IEA Secretariat, some 4 years into ENARD's present 5 year Term;
- The Workshop will provide:-
 - A series of high level regional perspectives;
 - Presentations from the individual operational Annexes, highlighting the emerging policy messages to date;
 - Series of complementary presentations, from recognised industry leaders; and
 - Ample opportunity for discussion and debate
- Workshop conclusions and recommendations will help guide the development of future international collaborative activities, both under the auspices of the IEA and beyond
